Detaching a Child from the Wrong Parents

If you've added a child to the wrong parents, you can detach the child from the family without deleting them from your tree.

1. Go to the **Tree** tab on the People workspace.
2. Make sure the correct family is the focus of the family group view. Then click the child's name.
3. Click **Person>Attach/Detach Person>Detach Selected Person**. The Detach window opens.

4. Click the checkboxes next to the father and/or mother.
5. Click OK.

268 Part 4: Managing Your Trees

Attaching a Child to a Father and Mother

If you've added an individual and his or her parents to your tree, but you did not know they were related when you entered them, you can still link them together.
